

BUGBANE

STICKY TRAPS
FOR FRUIT FLIES
& FUNGUS GNATS

INDOOR / OUTDOOR

16 PACK

INSTRUCTIONS

BugBane Sticky Traps are used for catching small flies and other insects without using poison in your home. The trap is ideal for catching flower flies, white flies, fruit flies, aphids, and other insects that thrive in your potted plants. Shake plants lightly from time to time so that insects on the leaves crawl upwards and stick to the traps.

BugBane Sticky Traps are easy to set up and work all year round. You can stake the bottom part into soil or use the green ties through the hole and hang it to a branch.
